PURPOSE

HNT Medical 6000 series DLS Exam Chair is designed to provide positioning and comfortable support for patients during general chemotherapy and dialysis examinations and procedures by qualified medical professionals.

INTENDED USE

This dialysis and chemotherapy power exam chair is primarily used for blood draw, extensive sit time procedures, dialysis, chemotherapy, general examinations and minor procedures. The wide range of positioning provided for by powered motors allow for extensive patient positioning and comfort for most examinations and procedures performed in the doctor's office. Whether it is the wide range of arm positioning for dialysis needs, the plush seating for long sit times, or the locking casters required by nurse practitioners to move patients to different chemotherapy rooms, this chair is extensive in its versatility and comfort.

The hand control provided with the chair provides ease of access by nurse and patient to easily adjust the backrest, leg rest, as well as the height positioning feature. An optional patient and nurse controller set attached to the chair for quick and accessible access includes extra features such as light, foot pedal motion, Trendelenburg positioning and nurse lock features for safe use. The table height can be adjusted from 19" to 38.5". In addition to these power positioning features, several manual adjustments are available.
