OPTIONAL ACCESSORIES

- Foot controller
- Light
- Battery Backup

PURPOSE

HNT Medical 6000 series POD Exam Chair is designed to provide positioning and comfortable support for patients during podiatry procedures by qualified medical professionals. Optional 'breathing and filtering' cushions provide a safe and healthy environment for patients. The filtering cushions prevent unintended deposits of bacteria, and petri dish growths from use from multiple patients.

INTENDED USE

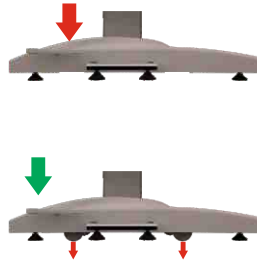

This power exam chair is primarily used in podiatry examination rooms for general examinations and minor procedures. The wide range of positioning provided for by powered motors allow for extensive patient positioning and comfort for most examinations and procedures performed in the doctor's office. Whether it is the ease of access at the legrest controller for the practitioner, or the podiatrist tray, or the Trendelenburg motor to angle the feet up toward podiatrist for operations or procedures, this chair offers comfort, accessibility and ease of use for every podiatry procedure and podiatrist need.

The hand control provided with the chair provides ease of access to easily adjust the backrest, leg rest, as well as the height positioning feature. An optional patient and controller set attached to the chair's legrest for quick and accessible access includes extra convenience for practitioner positioning. The table height can be adjusted from 19" to 38.5". In addition to these power positioning features, several manual adjustments are available.

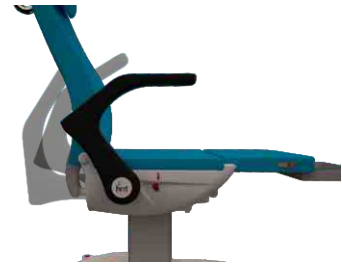

FEATURES AND BENEFITS

180 Degree Rotation
