

PMI® AnExK9 Harness Patient Care | Patient Packaging

Vertical lift harness designed to securely raise or lower your working dog out of a helicopter or into a disaster site, without the need for a bulky spreader bar. May also be used to extricate an injured animal; removable pack straps allow animal to be carried by a single person after extraction. Three sizes available.

Key Features

- Nylon Construction
- Adjustable 4-point strap system
- Holds Animal Securely
- Removable Pack Straps
- No Spreader Required
