

heightec® Quantum Backup Device Hardware | Rope Grabs and Ascenders

The Quantum fall arrest device is a new product that is suitable for a two person rescue. This self-trailing rope grab is designed to move on the rope easily. A unique cam (patent pending) actually grips the rope in two places and is designed to not damage the sheath of the rope while providing minimum slippage during an arrest.

Key Features: Opening catch allows easy attachment and detachment from the rope • All parts are visible for ease of inspection and maintenance • An additional energy absorber is not required • Can be used with a dynamic rope lanyard • Made with high strength alloy with stainless steel friction surfaces
