

PMI® Radium Release Hitch Kit Solutions and Kits | Kits

Radium Release Hitches have been proven to out-perform load release straps time after time. The Radium has greater extension (9+ ft) and better control and it can never fuse together under shock load the way that load release straps can. Carabiners are part of the system, simplifying your rigging.

Key Features

- 9 + ft extension • Can't "fuse" under shock loads
- Hook and loop fasteners hold carabiners in place for fast deployment
- Integral carabiners • Pre-tied with 8 mm accessory cord for convenience
- Instructions to re-tie hitch
- Comes in a convenient storage pouch

Additional Information

Shipping weight | 1.85 lbs

Weight | 1.81 lbs (816 g)
