- USE AND INSPECT THIS EQUIPMENT ONLY IN ACCORDANCE WITH THE MANUFACTURER'S INSTRUCTIONS.
- REFER TO ADDITIONAL MANUFACTURER'S INSTRUCTIONS FURNISHED WITH THIS EQUIPMENT BEFORE USE. YOU CAN CONTACT THE MANUFACTURER AT 1-706-764-1437 FOR IMPORTANT SAFETY INFORMATION.

PMI LIMITED WARRANTY

PMI products are warranted to the original retail purchaser to be free from defect in material and workmanship for a period of one year. PMI will repair or replace the item without charge provided inspection at our factory discloses no misuse or alteration, which, in our judgement, has affected the condition or functioning of the product. All implied warranties imposed by law in connection with the sale of PMI products are also limited in duration to a period of one year. PMI expressly excludes and shall not be liable for any consequential damages arising out of any breach of the express or implied warranties on sales of PMI products. Because of the high risks involved in high angle rope work such as, but not limited to, rescue, rope access, caving, rappelling, rock climbing and mountaineering, no further warranties exist or are implied by PMI. Regulations issued under the Magnuson-Moss Warranty Act require us to include the following statement: some states do not allow limitations on how long an implied warranty lasts nor the excluding or limitation of incidental or consequential damages, so the above limitations may not apply to you.

COMPONENT MIN. STRENGTHS & SPECIFICATIONS:

O-Ring: drop forged, alloy steel, 3" I.D., 4" O.D., MBS 10,000# (44kN), meets ANSI Z-359.1 and CSA Z259.12-01

PMI Adjustable Sewn Straps: 100% nylon webbing and thread, (individual strap test) webbing tears in the Mil-spec buckle at 3,800# (17kN)

Litter Attendant Line: PMI 11mm Rope, classified as NFPA Light-Duty (L) rope, MBS 6,550# (29kN)

Proper training is required before use. Read and retain these user instructions in a permanent record, and maintain a copy with the product along with the product use and care record. A use and care record should be established and maintained by the purchaser or user of the life safety product according to his need, and should include records specific to that product. Specific information to note would include date of purchase; date put into service; and service, maintenance and inspection records. Refer to this information before and after each use.

The user of this equipment assumes all risks and responsibilities associated with its use

v1-0402

Kit Care and Maintenance

This Litter Spider Kit is an adjustable 4-legged webbing litter spider sewn onto a forged O-ring. It comes complete with an 11mm attendant line and storage bag. It is intended for use by personnel trained and experienced in the rigging and use of rescue litters. This product was expressly designed for anchoring and tethering of a litter.

For Maximum Performance:

- ✓ Inspect straps upon receipt and before each use to ensure proper function of buckles, D-rings, and strap to verify stitching integrity
- ✓ Allocate kit to a single user, or maintain adequate information and history to ensure safe use of the product
- ✓ This Litter Spider Kit should be used only by properly trained and capable personnel
- ✓ Always be sure the product is dry before putting it into storage
- ✓ Repair or modification of this product without manufacturer's written consent is strictly forbidden

INSPECTION

Inspect Kit prior to each use to ensure there is no damage. Inspection criteria should be established by the user according to his needs, and must consider at least the following hazards:

- Missing or damaged components
- Improperly functioning adjustment components
- Chemical damage or exposure

Use Guidelines

- Check to be sure that this product is compatible with the other components of your system
- Ensure that anchors are designed to be of sufficient strength for the intended load.
- Beware possible abrasion where straps come into contact with hard surfaces
- Straps may be cleaned with clear water or a mild solution of non-detergent cleanser.
- Store in a clean, cool, dry environment
- Avoid contact with chemicals, solvents or corrosives.

Retirement

Remove the Litter Spider Kit from service and destroy it if it does not pass inspection or if there is any doubt about its safety or serviceability. Reasons for retirement may include (but are not limited to):

- Exposure to heat, chemical or other hazardous condition
- Fabric shows damage, tearing, abrasion, or excessive wear
- The stitching is cut, torn or excessively worn
- Metal components have developed sharp edges or are twisted out of their original shape
- If damage is evident that may effect your safety, or if any component of this Litter Spider Kit no longer complies with the standard to which it was made

Failure to comply with the instructions and information contained in this booklet may result in injury or death
