### DESCRIPTIONS

The companion chair has been designed considering the sitting, lying positions, usage times, and comfort of the patient's relatives.

The patient's relative can use the seat by adjusting the seat either in a sitting position or in a lying position. It gives the user a feeling of comfort in terms of ergonomics of use and material structure. With its physical structure and dimensions, it is a sofa that can be used easily in its environment and has a suitable design line for every room.
