

BLADES

STERILE OPHTHALMOLOGY MICRO SCALPELS

Feather sterile ophthalmology micro scalpels offer a lightweight aluminum handle with non-slip finger grips combined with an angled, ultra-sharp stainless steel blade.

Feather, a blade manufacturer of global renown, utilizes high-precision technology and carefully selected materials. Each Feather scalpel is made in Japan and meets strict ISO standards, resulting in exceptionally high quality and consistent strength and sharpness.

Features

- Sterilized with gamma radiation and hermetically sealed in blister package
- Non-slip finger grip ensures scalpel remains in user's grasp
- Knife can be autoclaved within included heat-resistant storage case
- Color-coded handles for easy identification of blade type
- Ideal for hospital operating rooms and surgical facilities, especially for ophthalmic surgeries involving semilaminar incisions and centesis incisions of the sclera and cornea
- Available in 3 angle options (15°, 30° and 45° angles)
- Individually packaged 5 per dispensing box
