## ASSEMBLY INSTRUCTIONS

1. Remove stool parts from carton.
  2. Place seat upside-down. Insert each leg into the bottom of the seat. Repeat this for the three remaining legs. Ensure that the legs are secured in place and that all four legs are at same height for stability and safety.
  3. Turn the stool right-side-up. Place storage tray between legs while inserting the cross braces into the four slots at the bottom of the receptacle legs.
  4. Ensure the rubber feet are in good condition and free of rips, tears and other signs of wear. All four feet must be flat on floor at all times. Stool is intended for sitting only. Do not stand on stool.
1. To rotate padded seat, pull up on handle until seat is free and rotate to desired position. Seat can rotate in both directions for a full 360° and locks in 12 positions.

Before user stands or sits, make sure the seat is in one of the 12 locked positions.
